PrivacyThe present invention relates to a sun roof for a vehicle. Vehicles having a vehicle roof that is movable between a closed position covering a vehicle interior and an open position to allow access to the vehicle interior are well known. Sun roofs of this type are generally constructed to seal the roof opening from the vehicle interior and

also prevent precipitation from entering the vehicle. Many sun roofs include a glass element that is supported for movement between an open position allowing access to the vehicle interior and a closed position to cover the vehicle interior.

Typically, the sun roof includes a sunroof frame to support and guide movement of the glass element. Sunroof frames are typically constructed to support the glass element and also prevent the glass element from bending or deforming during movement between open and closed positions. To this end, sunroof frames have been provided with a variety of different features to provide a desired level of rigidity, and have been constructed of various materials. For example, sunroof frames have been constructed from plastic, aluminum, steel, magnesium, and other suitable materials. We noticed that you're using an unsupported browser. The TripAdvisor

It was so nice to visit and stay at the resort in the middle of nowhere. We walked the 15 min to the beach after our hike and came back everyday to sit on the beach and drink wine or have lunch. Beautiful spot to do it. It's easy to get to, and you can get a shuttle from the airport to here. The hotel staff is very friendly, and the room was great. We stayed in a suite for our family of 3 and our toddler, and it was perfect. The
