What's New In?

Easy MP3 Tools is a program dedicated to all the issues regarding to tagging, converting and renaming single or multiple MP3 files. Besides, this is also a tool to quickly create a playlist (i.e. a list of your favorite songs) with its WPL,.M3U and.PLS file formats. In this version, besides fixing some bugs of previous version, all the features of previous version are included plus some new features which are described in detail below:

- * Fixed: The problem of not displaying information on the tag's ID after deleting the tag has been fixed.
- * Added: We added a simple player in order to hear or test the songs to better understand the features.
- * Added: We added a WPL support format. You can use this format to create a playlist.
- * Added: We added a new action named Update Readable Text when recording data from the files.
- * Added: We added two options to enable/disable the clipboard support (COPY/PASTE from clipboard).
- * Added: We added two new actions: Change Current Font Color and Change Current Text Color.
- * Added: We added the option to convert files to WAV.
- * Added: We added the option to disable the auto-playlist opening.
- * Added: We added the option to save all files in a folder (not in a specific location).
- * Added: We added the option to restore all tags in the "All" menu (not in specific tags).
- * Added: We added the option to get an ID3v1 tag (in.ID3 format) from all tracks, and all tags can be easily restored via this option.
- * Added: We added an option to get

an ID3v1 tag (in.ID3 format) for single files. * Added: We added the option to extract the ID3v1 tag information from all tracks in your folder. * Added: We added an option to view all files' ID3v1 tag information. * Added: We added the option to get an ID3v2 tag (in.ID3 format) from all tracks. * Added: We added the option to extract the ID3v2 tag information from all tracks in your folder. * Added: We added an option to get an ID3v2 tag (in.ID3 format) for single files. * Added: We added the option to get an ID3v2 tag (in.ID3 format) from the files with the current ID3v1 tag. * Added: We added the option to get the list of the files in a folder (with information in WPL and M3U format). * Added: We added the option to get the list of the files with the current ID3v1 tag
